

**IN THE CLAIMS:**

Please amend claim 15 and add new claims 19 and 20 as shown in the attached  
LISTING OF CLAIMS.

LISTING OF CLAIMS

---

Claim 1 (previously amended): A composition for enhancing the action of Vitamin A on the cellular activity of an individual, comprising a plurality of dispersed microspheres, said plurality of microspheres comprising Vitamin A and an antioxidant inserted into a first group of microspheres, and Vitamin C inserted into a second group of microspheres; wherein said microspheres are made of biologically active material.

Claim 2 (previously amended): The composition according to claim 1, wherein Vitamin C is present at a concentration of about 0.02% by weight, and Vitamin A is present at a concentration of about 0.009% to 0.02% by weight, based on the total weight of the composition.

Claim 3 (previously amended): The composition according to claim 2, wherein Vitamin C is contained in the second group of microspheres at a concentration of 0.02%.

Claim 4 (previously amended): The composition according to claim 3, wherein the first group of microspheres contains Vitamin A at an average concentration of about 0.014% by weight, based on the total weight of the composition.

Claim 5 (previously amended): The composition according to claim 4, wherein the first group of microspheres contains Vitamin A at an average concentration of 0.014% and Vitamin E at an average concentration of 0.0005% by weight, and cosmetic compounds selected from the group consisting of skin structures, micronutrients of the skin, sensorial agents, solar protection factors, emulsifiers, thickeners, sequestrants, antioxidants, fragrances, conservants, water and mixtures thereof.

Claim 6 (previously amended): The composition according to claim 1, wherein the Vitamin C to Vitamin A weight ratio ranges from about 1:1 to about 10:1.

↙ Claim 7 (previously added): The composition according to claim 1, wherein the antioxidant is Vitamin E.

Claim 8 (previously added): The composition according to claim 5, wherein the skin structures are squalan and sphingolipide complexes.

Cont Claim 9 (previously added): The composition according to claim 5, wherein the micronutrients of the skin is seaweed extract.

Claim 10 (previously added): The composition according to claim 5, wherein the sensorial agents are selected from group consisting of moisturizers, emollients, and silicones.

Claim 11 (previously added): The composition according to claim 10, wherein the moisturizers are selected from the group consisting of glycerin, hydroxy prolisilan, and combinations thereof.

Claim 12 (previously added): The composition according to claim 10, wherein the emollients are selected from the group consisting of butylene-glycol, cetyl lactate, and combinations thereof.

Claim 13 (previously added): The composition according to claim 10, wherein the silicone is cyclomethicone.

Claim 14 (previously added): The composition according to claim 5, wherein the solar protection factors are selected from the group consisting of butyl methoxydibenzoyl methane, 3-(4-methylbenzylidene) camphor, and combinations thereof.

Claim 15 (currently amended): The composition according to claim 5, wherein the emulsifiers are selected from the group consisting of acrylates/C10-30 alkyl acrylate crosspolymer associated to with trietanolamin, soybean lecitin, and combinations thereof.

Claim 16 (previously added): The composition according to claim 5, wherein the thickener is xanthan gum.

Claim 17 (previously amended): The composition according to claim 5, wherein the sequestrant is ethylene diamine tetraacetate (EDTA).

Claim 18 (previously amended): The composition according to claim 5, wherein the antioxidants are selected from the group consisting of buthyl hydroxytoluene (BHT), dl- $\alpha$ -tocopherol, and combinations thereof.

Claim 19 (newly added): A composition for enhancing the action of Vitamin A on the cellular activity of an individual, comprising a plurality of dispersed microspheres, said plurality of microspheres comprising Vitamin A and an antioxidant inserted into a first group of microspheres, and Vitamin C inserted into a second group of microspheres; wherein said microspheres are made of biologically active material, wherein the Vitamin C is present in an amount effective for enhancing the action of the Vitamin A on the cellular activity of an individual.

Claim 20 (newly added): A composition for enhancing the action of Vitamin A on the cellular activity of an individual, comprising a plurality of dispersed microspheres, said plurality of microspheres comprising Vitamin A and an antioxidant inserted into a first group of microspheres, and Vitamin C inserted into a second group of microspheres; wherein said microspheres are made of biologically active material, and Vitamin C is present at a concentration of about 0.02% by weight, and Vitamin A is present at a concentration of about 0.009% to 0.02% by weight, based on the total weight of the composition.
